Harry Duncanson,
Chairman of PAF's
Government Affairs
Committee

In addition to serving as Chairman of PAF's Government Affairs Committee, I've also had the honor of chairing PIA's Government Affairs Committee for the past six years. In November, due to PIA/GATF Board term limits, I will be stepping down as Chairman of PIA's Government Affairs Committee.

Over the years, I've been fortunate to observe first hand how hard PIA's expert lobbying team fights for members' interests in Washington and achieves results that have positively affected our bottom lines. As a PAF member, I'm grateful that they're fighting for my company's—Dynacolor Graphics—interests.

Most members don't visualize the full impact of what intense effort is put forth by our national group on our behalf. Many of you have come to Washington and have seen our team in action. For those of you who have not, I urge you to do so. I guarantee you will have a great time and appreciate more what your association does for you.

Our industry would look different if it weren't for the diligence and effectiveness of our national lobbying group, led by Lisbeth Lyons in Washington. They are able to have such a strong voice only as a result of the support provided by PAF members and by members of other PIA/GATF affiliates throughout the nation.

Please take a minute to review the PIA's current Advocacy Agenda on this and the preceding page. You'll see that the team is focused on priorities that directly affect the well-being of our member companies. When you hear from your association to contact your Senator or Congressman on these issues, please do so. I assure you, together we do make a difference! **PIA**
